PROJECTS

Simon Game. Designed and developed a dynamic and visually engaging Simon Game using a combination of HTML, CSS, and JavaScript.In this game,the computer displays a sequence of blinking four coloured buttons,which the human player is supposed to remember.The computer now wants user to enter the sequence that we have just seen.When the sequence is guessed correctly,we update the level.Implemented the game's core logic, including random sequence generation, user input validation, and scoring mechanism.Dealing with DOM Manipulation, Event Handling, timeouts or delays.(View)

ShopNow. Developed a fully responsive E-commerce website that showcase product listing, a navigation bar, search bar and user interface components.Applied advance CSS techniques, including animations and transition to improve visual effects.ShopNow includes advance techniques like flexbox, grid layout, animations, and transitions, enabling intricate and dynamic designs for modern web experiences.(View)
